Frameworks & Libraries	React.js, Next.js, ReactNative, Node.js, Express, MongoDB, Html5, TailwindCSS

PROJECTS

Shopping Cart App

- A user-friendly application designed to facilitate online shopping and manage items in a virtual cart.
- Built using the React JavaScript ,Redux library, providing a robust and efficient user interface for seamless interactions.
- Utilizes APIs to fetch product data, such as prices, descriptions, and availability, from an external source

Weather App

- The Weather App is developed using JavaScript and utilizes an API to fetch weather data.
- It provides users with real-time weather information based on their location or a specified location.
- The app displays current weather conditions such as temperature, humidity, wind speed, and visibility.

Portfolio

- The Portfolio project is a website that showcases an individual's or a company's work, skills, and achievements.
- It is built using HTML, CSS, and JavaScript to create an interactive and visually appealing user experience.
- The Project includes multiple sections such as an about me section, projects section, skills section, and contact section.
